Skin Clarity	28

FDA CLEARED

The Collagen P.I.N. is FDA cleared as a treatment to improve the appearance of facial acne scars in adults with Fitzpatrick Skin Types I - III, aged 22 years and older.

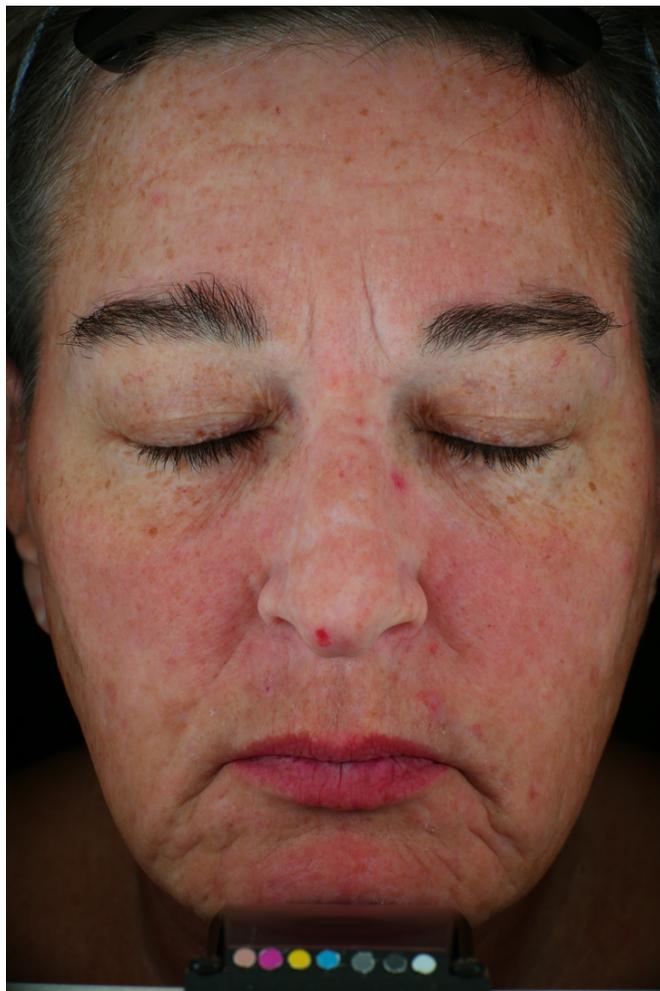

The 7th Generation VISIA® Skin Analysis System was used to deliver detailed imaging and analysis of over 25 microneedling subjects in a clinical study to evaluate the efficacy of Collagen P.I.N.®

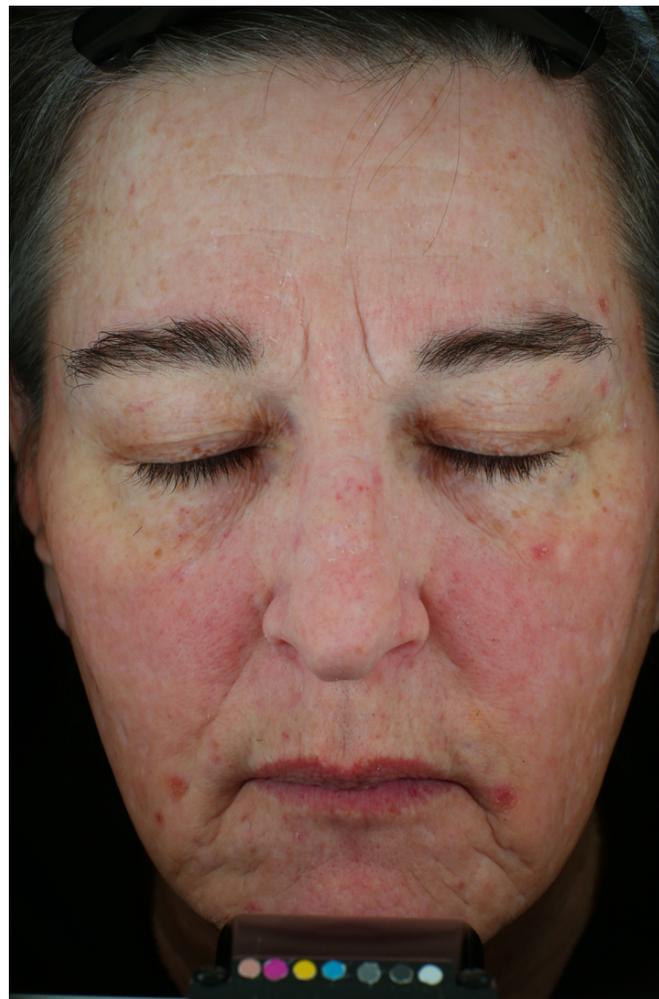

Canfield's RBX® Technology separates the unique color signatures of Red and Brown skin components for unequaled visualization of conditions that result in color concentration, such as spider veins, hyperpigmentation, inflammation and other conditions.
